Camie 100 Heavy Duty 6% Silicone Lubricant & Release Agent is a high solids (6%) blend of medium and high viscosity silicone fluids. It leaves a colorless, tenacious wet film when applied and is recommended for difficult release applications (rubber molding) as well as a lubricant for rubber or applications where high friction may be encountered.

In as much as CAMIE-CAMPBELL, INC. has no control over the use to which others may put the material, it does not guarantee that the same results described herein will be obtained. Each user should make his own tests to determine the material's suitability for his own particular use.

**Typical Applications:**

Camie 100 Heavy Duty 6% Silicone Lubricant & Release Agent is a high solids (6%) blend of medium and high viscosity silicone fluids. It leaves a colorless, tenacious wet film when applied and is recommended for difficult release applications (rubber molding) as well as a lubricant for rubber or applications where high friction may be encountered.

**Here are a few of our Customer's Favorite Uses for Camie 100:**

1) Use Camie 100 spray on the outside of PVA bags to help the string glide smoothly across the PVA bag.

2) Spray Camie 100 on the top of plastic that will be used for a no liner spinal jacket. The spray lubricant will reduce or eliminate any glove marks while plastics are being worked and toughened. Finished pieces will be left smoother and costly redo’s of jobs due to fingerprints can be eliminated.

3) Use Camie 100 on plastics and transfer materials to make removal of the transfer in the fabrication process smooth and easy.

4) When cutting liner material that has adhesive on it, the application of Camie 100 to the blades of scissors or other cutting blades will allow for a smooth cut with no gummy build of glue on the blades. When you are done, just wipe the blades clean.
**Camie 300 General Purpose Spray Adhesive** was especially formulated to bond plastics, paper, cardboard, fabric, leather, foil, fiberglass to metal, wood, and a variety of other substrates.

In addition to O&P applications it is often used in the screen print, pool table, and sewing industries. Camie 300 is essentially colorless. It offers quick tack and produces bonds that may be temporary or permanent.

### Applications
Camie 300 General Purpose Spray Adhesive bonds paper, cardboard and some fabrics. For general light weight bonding on a wide variety of substrates.

### Container Size
20 Fluid oz. Container

### Product Description
Aerosol Adhesive

### Net Weight
14 Ounces

### Cans Per Case
12

### Case Dimensions -Inches
11.75" L X 8.75" W X 10.5" H

### Case Weight
14.7 Pounds

### Cases Per Pallet
72

### Appearance
White

### Odor
Mint When Wet

### Solvent System
Hexane & Acetone Blend

### Propellant
DME & Hydrocarbon Blend

### Bond Time
15 Seconds to 2 Minutes

### Heat Resistance
Max. Service Temperature 120˚F

### Solids
21% +/- 2%

### Spray Pattern
Mist

### VOC %
63.9

### VOC Compliant for CA & OTC
Yes

### Aerosol Flammability Level
Level 3 Aerosols

### Warranty Period
One Year From Date of Shipment

### Food packaging Adhesive Complies with 21CFR 175.105
Yes

### DOT Proper Shipping Name
Consumer Commodity ORMD for domestic ground shipment. (See MSDS for additional shipping information)
